

## Feline Surgery Electives

**Patient/Client:** \_\_\_\_\_ **Chart #:** \_\_\_\_\_

Below are lists of elective services that are recommended for the best care of your pet to help reduce anesthetic risk. Please initial if you would or would not like these additional services done with your pet's surgery today.

### Pre-operative ECG +/- Radiographs:

A pre-operative screen ECG +/- radiographs is an easy way to assess the cardiac risk of anesthesia. A routine ECG can also be used to determine the potential or presence of other causes of heart rhythm abnormalities and can give an indication of overall heart health. Adding radiographs can help visualize the shape and size of the heart and cardiac vessels. This information is sent electronically and evaluated by a cardiologist.

A pre-operative ECG screen is \$68.00 Accept \_\_\_\_\_ Decline \_\_\_\_\_

A pre-operative ECG screen with radiographs is \$197.00 Accept \_\_\_\_\_ Decline \_\_\_\_\_

### Therapeutic Laser Treatment:

Therapeutic laser treatment is a non-invasive, drug free solution for animal pain and healing. It uses light to stimulate cells and increase blood circulation. At the correct laser wavelength, pain signals are reduced, and nerve sensitivity decreases by releasing endorphins or natural painkillers. The cost of this procedure is \$ 30.00

### Home Again Microchip:

This is a form of permanent identification using a tiny microchip. It contains a unique identification number that aids in recovery of a lost/found pet. The microchip is inserted prior to surgery using a hypodermic needle. Pinewoods Animal Hospital pays for your registration and first year of service. The cost for the microchip is \$55.00.

Accept \_\_\_\_\_ Decline \_\_\_\_\_ Already has one! \_\_\_\_\_

### Elizabethan Collar: aka "The cone of shame!"

A protective collar that slips over the head or wraps around the neck area to prevent licking and chewing of incisions. There are several different types of collars, but they are not one size fits all. Pine Woods Animal Hospital will decide which collar is right for your pet. **If your pet starts licking in the hospital, a collar will be placed automatically.**

The collars range in price from \$15.00 - \$25.00

Accept \_\_\_\_\_ I have one \_\_\_\_\_ I decline an e-collar against medical advice \_\_\_\_\_

**We recommend that your pet is on flea prevention prior to staying at our hospital for surgery. However, if your pet has fleas, we will require a flea treatment to be applied or administered. There is a charge for this medication.**

The surgical staff will help you decide what product is best for your pet and lifestyle. You can also purchase additional flea prevention to take home. We carry Revolution (1 month topical flea prevention) and Bravecto (3 month topical flea/tick prevention) Prices are determined by weight.

Please send me with flea prevention - Yes No Type/Amount: \_\_\_\_\_

**Soft Paws Application:** Soft paws are an excellent alternative to declawing. They are completely safe and humane and can be used on cats of all ages. Soft paws are vinyl nail caps that are glued on to your cat's existing nails. They are easy to apply, cats tolerate them extremely well and they are safe and non-toxic. They do not interfere with the normal extension and retraction of your cat's nails. Your cat can still scratch, allowing normal stretching and scratching behavior to continue-just no damage will occur! Once the nail caps are applied, they remain in place for ~ 4-6 weeks. They will fall off with the natural growth of your cat's nails. The cost for 2 paws is \$23.00. The cost for 4 paws is \$32.00. Please apply soft paws \_\_\_\_\_ Do not apply soft paws \_\_\_\_\_

# Surgery and Anesthesia Consent

Pet's name: \_\_\_\_\_ Species: \_\_\_\_\_

Age: \_\_\_\_\_ Sex: \_\_\_\_\_ Color: \_\_\_\_\_

Procedure: \_\_\_\_\_

My pet has been fasted: YES NO

My pet is allergic to: \_\_\_\_\_

My pet is on Heartworm Prevention: YES NO Flea Prevention: YES NO

Last given/applied: (HWP) \_\_\_\_\_ (Flea Prev) \_\_\_\_\_

My pet is on these other medications including OTC medications (ex. Aspirin, Ibuprofen, Tylenol, etc.)

Dose/Frequency/Last Given:

While your pet is under anesthesia we maintain a constant record of vital signs including heart rate, respiratory rate, oxygenation levels, blood pressure, and temperature. This helps us to detect potential anesthetic complications early and treat them before they become life threatening.

- I have been informed that there are risks and complications associated with anesthesia and surgery.
- I acknowledge that my pet may have an underlying condition that has not been detected with diagnostic tests/tools to date, and I further understand that during the course of the operations or procedures, unforeseen conditions may arise that could necessitate the performance of additional procedures.

I release Pine Woods Animal Hospital, P.C. and staff from any liability relating to unforeseen complications arising from surgery and/or anesthesia. \_\_\_\_\_ (PLEASE INITIAL)

I will be available at the phone numbers listed below at all times during the day of the procedure. If the doctors cannot reach me by phone, I authorize any treatment deemed necessary for the health of my pet. \_\_\_\_\_ (PLEASE INITIAL)

- I am the owner (or agent for the owner of legal age) for the animal described above and I have the authority to execute this consent.
- I hereby authorize and direct the veterinarians of Pine Woods Animal Hospital, P.C. to perform the procedure(s) described above.
- I agree to pay in full for services rendered, including those deemed necessary for medical or surgical complications, or any other unforeseen circumstances.

The nature and purpose of the procedure(s) to be performed on my pet has been clearly explained and I have no further questions at this time. \_\_\_\_\_ (PLEASE INITIAL)
